CAREER SUMMARY:

Hey there, I am Anurag a passionate front-end web developer with expertise in building dynamic, responsive, and user-friendly websites and applications. My core skills include HTML5, CSS3, JavaScript, allowing me to craft intuitive interfaces. I also specialize in ReactJS, leveraging its powerful component-based architecture to create seamless user experiences and Tailwind CSS and also I am exploring Backend technology like Node.js,

Express.js, MongoDB and Java as well as learning creating RESTful APIs.

With a strong foundation in version control using Git and GitHub, I ensure efficient collaboration and clean, maintainable code. I am always eager to learn new technologies and stay updated with the latest trends in web development to deliver high-quality, scalable solutions.

RELEVANT PROJECTS:

Home Automation Project -

- We have built a website that controls home appliances through voice commands and with the help of a manual button. I have contributed to make a developer section where we show who made which features and I also created a chatbot which tells you everything about the projects. You just have to ask a query; the chatbot will tell you about the projects and everything.

Food Order App in ReactJS --

. Created a food delivery app in ReactJS adding features of add to cart and proceed to checkout and deploy on Vercel. Link- <https://food-website-in-reactjs.vercel.app/>
